Advanced Easy-to-clean PU Leather

1. 5 years hydrolysis resistance, which passed 72 hours sodium hydroxide immersion test
2. Abrasion Resistance: passed 1000000 cycles flex test
3. Superior Breathability: with 7000 of air holes per square meter
4. Easy to Clean: just wipe with a wet cloth
5. Both Cold Resistance & Hot Resistance: has a cold resistance of -25°C and hot resistance of 70°C

Safe
Heathy
Eco-friendly

RoHS was adopted in February 2003 by the European Union. This directive restricts the use of the hazardous materials such as lead, mercury, Cadmium, Hexavalent chromium, PBB, PBDE in the manufacture of various types of electronic and electrical equipment, among which the maximum permitted concentrations of lead is 0.1%. All raw material ROTA I used on its products have to pass RoHS inspection to ensure the compliance of the directive requirements.

Interior with

High-quality Materials and First-class Workmanship

Advanced Upholstery

Artificial leather has become increasingly popular because of its appearance and flexibility, and also because of the positive effect on the environment. As more individuals shop for alternative leather products, fewer animals are killed each year, and less pollution is generated from the processing of those animals.

RT8717 uses this exquisite wear resistance,eco-friendly PU leather for cushions and covers to improve the performance of this massage chair.

PU leather : Soft texture,strong,durable,cold resistance, eco-friendly and easy to clean

Spandex fabric : Comfortable, has great elasticity, and is durable and strong

Quality is What Counts Most

Our quality assurance system is certified in accordance with the ISO 9001 standards. An independent quality assurance department is responsible for all working procedures required to ensure that all manufacturing processes are carried out in accordance with international technical conditions and with the customer specifications.

A massage chair consists of thousands of components, every massage chair sent to our customers has been through standard procedures of product manufacturing, testing, inspection, failure rate reporting, vendor selection and scoring for controlling the quality.

Let's take a look into the screws used on our massage chairs: they have to pass Specifications/Size/Reliability testings and visual inspections before arriving at our assemble lines.

- Strong and durable with excellent finish.
Deformation resistance, impact resistance and wear resistance.
- Specially-made anti-impact and shock absorption screws are used to fix vibration parts.

We Use Top-of-the-Line Fire Resistant Material to Ensure Safety

We use fire resistant material all over the chair:

- Double-layered injection molding backrest to improve hardness and safety;
- Power box is sealed off with fire resistant plastic covers;
- Chair body is surrounded by fire resistant foam cushions;

In conformity with GB/T2408 V0 fire resistant standard

In conformity with GB/T2408 V0 fire resistant standard

Heavy Duty Iron Metal Chair Frame

Provide Solid Support

Iron frame connects the guide track and provides solid support for the chair. The efficiently designed and constructed iron frame is made of heavy duty iron to provide optimum support for the massage chair, preventing sagging and increasing its usage life.

Why ROTAI Massage Chair Weighs More?

The 1.5-2.5mm square tube we use for chair frame, 1-1.5mm thicker than C channel iron frame, is more rugged than equivalent quality C channel iron frame.

High-tech Features From Inside Out

6 Manual Massage Techniques

Sync

Massage rollers perform synchronized kneading & tapping massage down along the back.

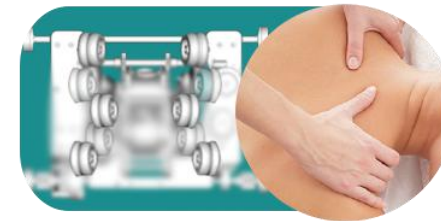

Tapping

Massage rollers perform intermittent tapping massage on specific meridian points along the back.

Knocking

Massage rollers perform constant knocking massage on specific meridian points along the back.

Kneading

Massage rollers perform pressing massage on the muscles and rotate in circular motions, and slowly roll down along the back.

Shiatsu

Massage rollers press and hold still on the back and move down slowly along the back.

3D Shiatsu

Massage rollers stick out by 2-8cm automatically, then pushing down along the spine.

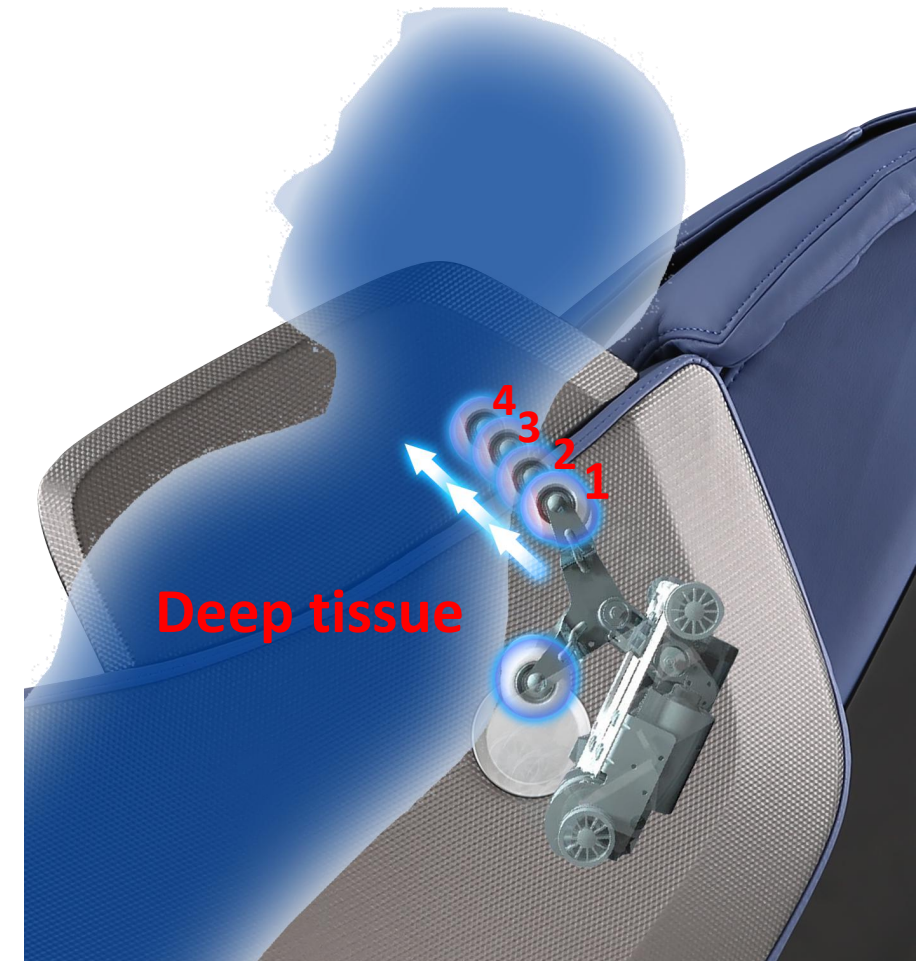

New 5 Massage Techniques

1. Pinch grip+lift&pull combo massage for neck to clear the mind and improve memory.
2. Pressing&kneading combo massage for shoulders to help the phubbing and office workers relieve sore and tension in the neck and shoulders.
3. New gentle shoulder blades therapy.
4. New chest stretching to open and mobilize thoracic spine, improving the flexibility and range of motion of the chest muscle group.
5. Thai stretching to loosen the waist muscles and strengthen the lumbar spine.

3D Deep Tissue Massage with Adjustable Intensity Settings

While Manual 3D massage program is running, you can press 3D button to navigate among level 0, 1,2,3,4,5 to change the 3D protruding intensity;
While Auto 3D massage program is running,press this button to navigate among level 1,2,3 to change the 3D protruding intensity.

Level 1,2 works on superficial fascia;
level 3,4 reaches deep stiffened fascia;
level 5 works at visceral fascia and exercise the bones.

ROTAI Super Long L-shape Back Track

Conforming to ergonomic principle,126CM track can reclines to 130-160° ,delivering three dimensional massage along the entire length of the spine,and all the way down to hips and the thighs,covers up to 60% more of the back than conventional chairs

Head massage—— clear the mind and improve memory

Neck massage——relieve fatigue and boost blood flow

Shoulder massage——relieve stiffness and pain

Back massage——boost viability of muscles

Waist massage——reduce fat and strengthen muscles

Buttock massage——shape and tone muscles

Thigh massage——soothe sciatic nerves

Ultra-High Sensitive AI Body Scanning

Mechanism and track are vital parts for the performance of massage chair, they work together to bring wellness for the users;

Body scan system, which helps the rollers find the right position to massage, can double the massage efficiency for each massage session.

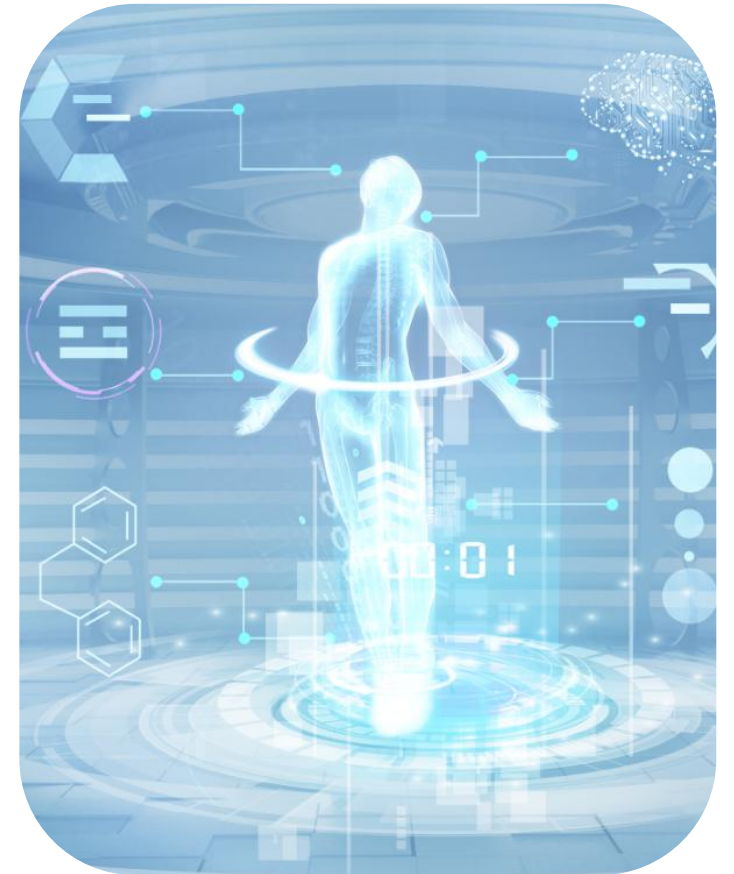

RT8717 uses advanced hall sensor technology and walking motor count signal system for pinpoint shoulder positioning.

Tight & Comforting Air Pressure Massage

Bumpy dots pad for hands, while the airbags pressing massage is running, the protruding dots will stimulate the acupoint on hands and arms to help boost the blood circulation.

Leg and Foot Massage vital parts of a perfect massage experience

4 Advantages of RT8717 to improve leg&foot massage efficiency:

1. 12CM Extra long legrest with hand simulation kneading and rubbing massage techniques.
2. Innovative patented double acting legrest brings overall relaxing feelings.
3. Three spiky rollers under foot perform rolling and keading massage.
4. Warm heat for legs and knees.

2 Sections Footrest and Legrest

Leg and foot massage is considered vital part of massage experience.

RT8717 is installed with 2 sections legrest combined with featured air pressing,kneading&rubbing techniques and extra warming heat therapy for extreme comfort.

12CM Extra Long Legrest

The length of RT8717 upper legrest reaches 36CM, 12CM longer than conventional legrest, covering from ankle to knee.

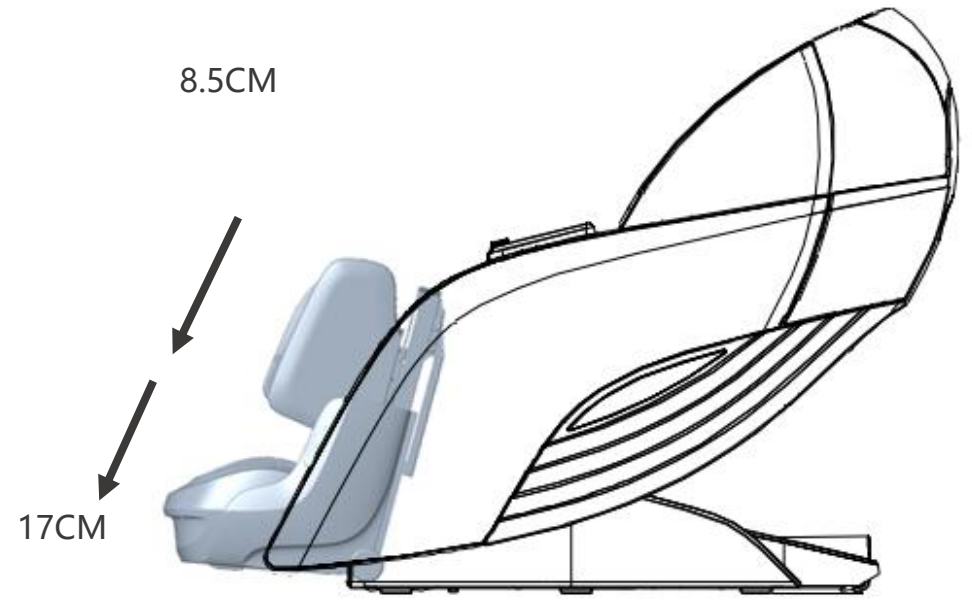

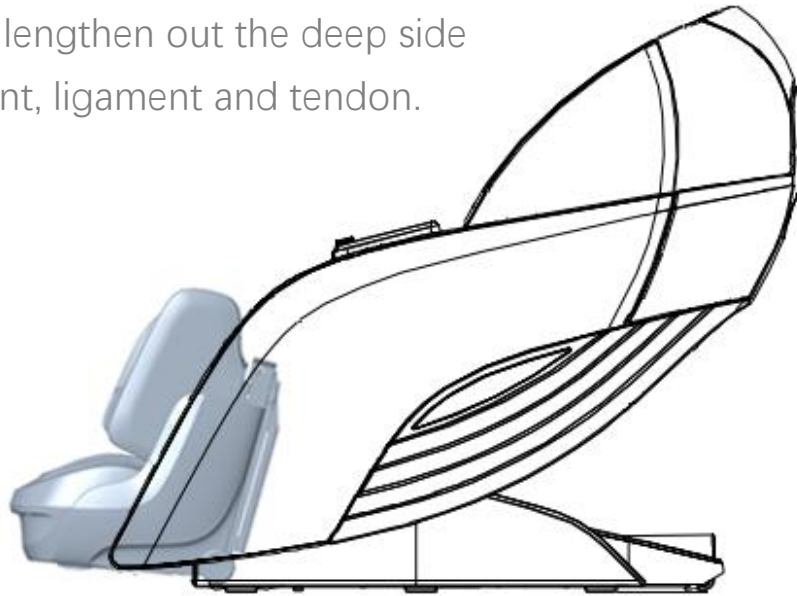

360° Enveloping Kneading&Rubbing Massage

Legrest airbags can perform upwards and downwards kneading& rubbing massage along the legs, helping remove lactic acid from muscles and speed up cell recovery.

Auto Extension Legrest & Footrest

RT8717 is installed with double acting legrest & footrest.
Upper legrest can extend by 85mm
and lower footrest can extend by 70mm,
auto suit various users with different stature,
helping to stretch and lengthen out the deep side
of our leg's muscle, joint, ligament and tendon.

Enveloping Airbags with Graphene Heat for Legs

Adding up to 360mm long, 4pcs double-layered airbags are built in each side of legrest, combined with instant heat up Graphene heat, RT8717 legrest can help to soften hard muscles, dilate blood vessels and increase blood circulation around the legs.

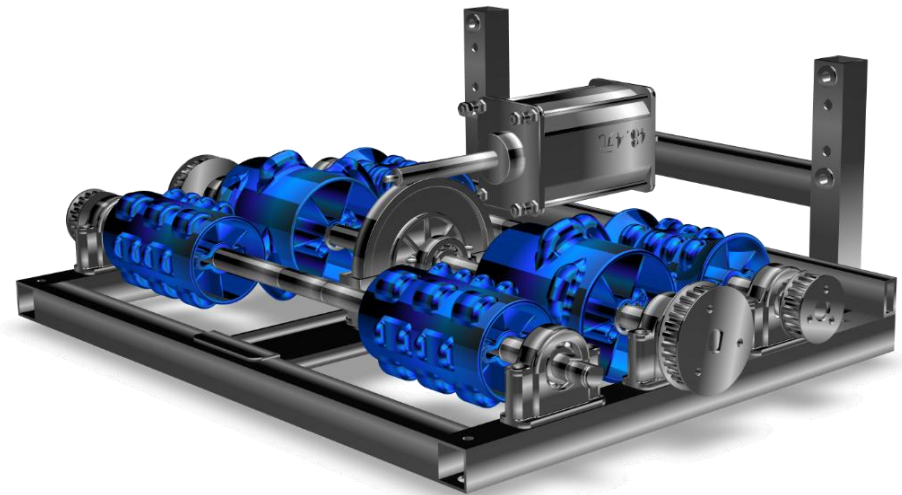

Three Rollers Under Foot

Perform hand simulation rolling and shiatsu massage

It's a long way to go for the blood to flow from the core to the hands and feet, they are tend to get colder than other parts of the body.

Three rollers under foot perform hand simulation rolling and shiatsu massage underfoot.

- Spiky rollers offers extra stimulation on acupoints of soles.
- 3 spiky rollers under foot provide precise stimulation to the reflex areas.
- 5 massage intensity settings for foot air pressure.

Wrap-around Instep&Ankle Airbags

Covering the instep and ankle,
8 double-layered airbags provide enveloping air pressure
massage to increase fresh blood supply to the feet,
lower high blood pressure,
relieve tired, achy feet and ward off injuries .

Foot Massage Benefits

The reflex zone at the foot is considered encompassing vital nerve as our head. Regular pressure massage the toe reflex zone can help eliminating toxin and beautify skin.

Sole reflex zone connects with the digestion system, A steady massage here can help promote intestine movement and improve digestion and enhance absorption.

The airbags compress at both sides of ankles to deliver pressing massage.

Durable Property Carbon Fiber Added in Backrest

Superior performance carbon fiber heating features energy efficient, safe and even heat distribution,proving quiet and reliable warm therapy for your back.

Heat function provides soothing warm care,
equipped with thermostat,the perceived temperature stays ultra-comfy.

Zero Gravity Space Capsule

The horizontal position that the height of the legs slightly higher than the upper body, at 126 ± 7 degrees between the upper body and legs, the weight of body can evenly distributed throughout, reducing the pressure of the spine and joints both physically and mentally,

Stream your tunes right from your iPhone Ipad or android Bluetooth enabled smart phone or music player devices

Multi-function Mobile Device Holder with Wireless Charging Function

Put the wireless charging phone into the receptacle to charge the device when needed

ps: Touch sensor to clamp/slide open the the left and right arms of cradle.

USB Charging Port

You may also use the USB port next to the mobile phone/controller organizer for charging.

Anti-pinch Feature

This massage chair comprising the following principal parts: A headpiece, a backrest, a seat, two armrests, a legrest, a footrest and a power box. We use solid rods, axles, crews and rigid hangers to attach all parts and use anti-pinch sensors in between every moving parts to avoid injury.

We use 5 anti-pinch sensors at both sides of RT8717 legrest: left and right sides of upper legrest, left, right sides and bottom of footrest, which can detect obstacle and avoid injury.

Removable Cushion for Care and Maintenance

The cushion unit is composed of big back cushion, medium cushion and small head pillow. The medium cushion and small head pillow can be removed for cleaning during daily use.

It is super easy to clean: just wipe with a moist cloth.

To treat stains on back cushion or pillow, use a water-based upholstery cleaner only, wipe it with moist cloth, then air dry.

PS: Big back cushion is not recommended to take off for cleaning.
